

Department Type	Department Name	Description
Acute Care	Accident & Emergency (A&E)	Immediate attention to injuries and urgent illnesses.
Acute Care	Burn Unit	Specialized care for burn patients, supporting swift recovery.
Acute Care	Critical Care Medicine	Intensive life support for severe or life-threatening conditions.
Acute Care	Emergency Medical Services (EMS)	Swift response to medical emergencies and patient transportation.
Acute Care	Intensive Care Unit (ICU)	Dedicated to monitoring and treating critically ill patients.
Acute Care	Trauma Center	Comprehensive care for patients with severe injuries, utilizing a multidisciplinary approach.
Administrative	Admissions	Processes patient admissions, ensuring a smooth entry into the healthcare system.
Administrative	Billing and Coding	Manages the financial aspects of patient care, ensuring transparency and efficiency in billing processes.
Administrative	Discharge Planning	Assists patients in transitioning from the hospital to home or another care setting, facilitating a smooth recovery process.
Administrative	Medical Records	Maintains and manages patient medical records with precision and confidentiality.
Administrative	Patient Relations	Addresses patient concerns and resolves problems to foster a positive healthcare experience.
Administrative	Risk Management	Identifies and mitigates potential risks to patients and staff, ensuring a safe healthcare environment.
Allied Health	Audiology	Evaluates and treats hearing and balance disorders for overall patient well-being.
Allied Health	Dietetics	Provides nutritional counseling and support to patients, emphasizing the importance of a balanced diet in recovery.
Allied Health	Occupational Therapy	Assists patients in regaining daily living skills after an injury or illness, promoting independence.
Allied Health	Physical Therapy	Helps patients improve movement and function, playing a crucial role in rehabilitation.
Allied Health	Respiratory Therapy	Offers care and treatment for patients with respiratory problems, ensuring optimal respiratory health.
Allied Health	Speech-Language Pathology	Evaluates and treats speech, language, and swallowing disorders, promoting effective communication and nutrition.
Behavioral Health	Addiction Medicine	Specialized in treating patients with substance abuse disorders, offering comprehensive support for recovery.
Behavioral Health	Child and Adolescent Psychiatry	Provides mental health care tailored to the unique needs of children and adolescents, fostering mental well-being.
Behavioral Health	Geriatric Psychiatry	Offers mental health care for older adults, addressing the specific challenges faced in later stages of life.
Behavioral Health	Mental Health Services	A comprehensive department offering a range of services for the diagnosis and treatment of mental health disorders.
Behavioral Health	Substance Abuse Treatment	Provides treatment and support for individuals struggling with substance abuse, promoting recovery and rehabilitation.
Biomedical	Blood Bank	Collects, stores, and distributes blood and blood products for emergency and elective procedures.

Biomedical	Laboratory Medicine	Performs tests on blood, tissue, and other body fluids to diagnose and monitor diseases, contributing to accurate medical decisions.
Biomedical	Pathology	Examines tissues and organs to diagnose diseases accurately, guiding treatment plans.
Biomedical	Transfusion Medicine	Provides safe and effective blood transfusions to patients, ensuring compatibility and safety.
Cardiology	Electrophysiology	Studies the electrical activity of the heart, aiding in the diagnosis and treatment of cardiac conditions.
Cardiology	Interventional Cardiology	Utilizes minimally invasive procedures to treat heart disease, ensuring precision and quicker recovery.
Cardiology	Pediatric Cardiology	Dedicated to providing specialized care for infants, children, and adolescents with heart disease.
Cardiology	Thoracic Surgery	Performs surgery on the heart, lungs, and other chest organs, addressing complex cardiac conditions.
Dermatology	Cosmetic Dermatology	Treats skin conditions for cosmetic purposes, enhancing patients' confidence and well-being.
Dermatology	Dermatologic Surgery	Specialized in performing surgery to remove skin lesions and tumors, ensuring optimal skin health.
Dermatology	Mohs Micrographic Surgery	A specialized technique for removing skin cancer, combining precision and minimal scarring.
Dermatology	Pediatric Dermatology	Dedicated to providing care for infants, children, and adolescents with skin diseases, addressing unique dermatological challenges.
Ear, Nose, Throat	Head and Neck Surgery	Specializing in treating surgical conditions of the head and neck, ensuring comprehensive care.
Ear, Nose, Throat	Laryngology	Focusing on disorders of the larynx (voice box), offering specialized care for voice-related issues.
Ear, Nose, Throat	Otology	Specializing in disorders of the ear, addressing hearing and balance issues comprehensively.
Ear, Nose, Throat	Pediatric Otolaryngology	Providing specialized care for infants, children, and adolescents with ear, nose, and throat disorders, ensuring child-friendly services.
Family Medicine	Geriatric Medicine	Dedicated to providing care for older adults, addressing age-specific health concerns.
Family Medicine	Internal Medicine	Focusing on the prevention, diagnosis, and treatment of diseases in adults, ensuring holistic healthcare.
Family Medicine	Pediatrics	Providing care for infants, children, and adolescents, catering to the unique needs of the younger population.
Family Medicine	Sports Medicine	Specializing in the diagnosis, treatment, and prevention of sports-related injuries, ensuring athletes receive optimal care.
Gastroenterology	Endoscopy	Utilizing specialized instruments to examine the digestive tract, aiding in the diagnosis and treatment of gastrointestinal conditions.
Gastroenterology	Hepatology	Specializing in diseases of the liver, bile ducts, and pancreas, ensuring comprehensive care for hepatic conditions.
Gastroenterology	Inflammatory Bowel Disease (IBD)	Treating conditions such as Crohn's disease and ulcerative colitis, ensuring effective management and support.
Gastroenterology	Pancreaticobiliary Disease	Specializing in treating conditions of the pancreas and bile ducts, ensuring precise diagnosis and treatment.
Hematology-Oncol	Bone Marrow Transplant	Replacing diseased bone marrow with healthy cells, offering a chance for recovery in hematological conditions.
Hematology-Oncol	Medical Oncology	Treating cancer with medications, ensuring personalized and effective cancer care.

Hematology-Oncol	Radiation Oncology	Using radiation to treat cancer, contributing to comprehensive cancer treatment plans.
Hematology-Oncol	Surgical Oncology	Utilizing surgery to treat cancer, ensuring a multi-disciplinary approach to cancer care.
Imaging	Interventional Radiology	Utilizing imaging techniques to guide minimally invasive procedures, ensuring precision and safety.
Imaging	Magnetic Resonance Imaging (MRI)	Creating detailed images of the body's internal structures using magnetic fields, aiding in accurate diagnosis.
Imaging	Nuclear Medicine	Using radioactive tracers to diagnose and treat diseases, contributing to advanced medical imaging.
Imaging	Positron Emission Tomography (PET)	A specialized imaging technique providing insights into metabolic activity, aiding in disease diagnosis and monitoring.
Imaging	X-ray	A fundamental imaging modality, aiding in diagnosing a variety of conditions, from fractures to lung infections.
Nephrology	Dialysis	Providing life-sustaining treatment for individuals with kidney failure, ensuring optimal renal function.
Nephrology	Kidney Transplantation	A surgical procedure replacing diseased kidneys with healthy ones, offering a renewed lease on life.
Neurology	Epilepsy	Dedicated to the diagnosis and treatment of epilepsy, ensuring optimal management of seizure disorders.
Neurology	Movement Disorders	Specializing in conditions affecting movement, providing expert care for disorders like Parkinson's disease.
Neurology	Neurovascular Surgery	Focused on surgical interventions for diseases affecting the blood vessels of the nervous system.
Neurology	Stroke	A specialized unit addressing acute cerebrovascular events, ensuring rapid response and comprehensive care.
Obstetrics-Gynec	Female Pelvic Medicine and Reconstructive Surgery	Specializing in pelvic floor conditions, providing expert care for issues like incontinence and prolapse.
Obstetrics-Gynec	Maternal-Fetal Medicine	Focused on high-risk pregnancies, ensuring the well-being of both mother and baby.
Obstetrics-Gynec	Reproductive Endocrinology and Infertility	Evaluating and treating conditions related to fertility, offering support for couples trying to conceive.
Pain Management	Interventional Pain Management	Utilizing minimally invasive procedures to manage chronic and acute pain, offering relief for patients.
Pain Management	Palliative Care	Providing supportive care for patients with life-limiting illnesses, emphasizing quality of life.
Rehabilitation	Cardiac Rehabilitation	Assisting patients in recovering from heart disease, ensuring a comprehensive approach to cardiovascular health.
Rehabilitation	Neurological Rehabilitation	Focused on helping patients recover from neurological disorders, offering tailored rehabilitation programs.
Rehabilitation	Orthopedic Rehabilitation	Assisting patients in recovering from musculoskeletal injuries, ensuring optimal mobility and function.
Rehabilitation	Physical Medicine and Rehabilitation	Providing comprehensive rehabilitation services for patients with various conditions, emphasizing functional improvement.
Rehabilitation	Speech-Language Pathology	Assisting patients in regaining speech and swallowing skills after an injury or illness, promoting effective communication.
Surgery	Breast Surgery	Specializing in the surgical treatment of breast conditions, including cancer.
Surgery	Colorectal Surgery	Treating diseases of the colon, rectum, and anus through surgical interventions.

Surgery	Neurosurgery	Addressing diseases and disorders of the nervous system through advanced surgical techniques.
Surgery	Ophthalmic Surgery	Treating diseases and disorders of the eye, ensuring optimal vision and eye health.
Surgery	Oral and Maxillofacial Surgery	Specializing in diseases and disorders of the mouth, jaws, and face, offering surgical solutions.
Surgery	Orthopedic Surgery	Treating diseases and injuries of the musculoskeletal system through surgical interventions.
Surgery	Pediatric Surgery	Providing surgical care for infants, children, and adolescents, ensuring specialized pediatric services.
Surgery	Plastic Surgery	Restoring function and appearance after injury or illness through various surgical procedures.
Surgery	Urologic Surgery	Specializing in the diagnosis and treatment of diseases of the urinary tract and male reproductive system.
Surgery	Vascular Surgery	Addressing diseases and disorders of the blood vessels through various surgical interventions.
Transplantation	Heart Transplant	Replacing a diseased heart with a healthy one, offering a life-saving procedure.
Transplantation	Kidney Transplant	Replacing diseased kidneys with healthy ones, ensuring optimal renal function.
Transplantation	Liver Transplant	Replacing a diseased liver with a healthy one, offering a chance for a renewed life.
Transplantation	Lung Transplant	Replacing diseased lungs with healthy ones, ensuring optimal respiratory function.
Urology	Male Infertility	Evaluating and treating conditions related to male fertility, offering solutions for infertility.
Urology	Pediatric Urology	Providing specialized care for infants, children, and adolescents with urologic conditions.
Urology	Reconstructive Urology	Treating structural abnormalities of the urinary tract through surgical interventions.
Urology	Stone Disease	Treating conditions related to kidney stones and other urinary stones, ensuring effective management.
Vascular Surgery	Endovascular Surgery	Utilizing minimally invasive techniques to treat vascular conditions, ensuring precision and quicker recovery.
Vascular Surgery	Open Vascular Surgery	Using traditional surgical techniques to treat vascular conditions, ensuring comprehensive care.
Women's Health	Breast Cancer Center	Offering specialized care for women with breast cancer, ensuring comprehensive breast health services.
Women's Health	Gynecological Oncology	Specializing in the diagnosis and treatment of gynecologic cancers, offering personalized care.
Women's Health	Menopause Management	Providing support and treatment for women experiencing menopause, ensuring a smooth transition.
Women's Health	Osteoporosis Center	Offering specialized care for women with osteoporosis, focusing on bone health.
Additional	Chaplaincy	Providing spiritual support to patients, families, and staff, fostering emotional and spiritual well-being.
Additional	Environmental Services	Maintaining a clean and safe hospital environment, ensuring optimal hygiene standards.
Additional	Food and Nutrition Services	Providing meals and nutritional counseling to patients, emphasizing the importance of a balanced diet.

Additional	Information Technology	Maintaining the hospital's computer systems and networks, ensuring seamless operations.
Additional	Security	Ensuring the safety and security of patients, staff, and visitors, creating a secure healthcare environment.
Additional	Volunteer Services	Providing opportunities for volunteers to contribute to the hospital, fostering community engagement.
